-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This is the First Office Action in response to the Election filed on October 8, 2004.

Election/Restrictions

1. Claim 4 is withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on October 8, 2004.

2. Applicant's election with traverse of Group I, Figures 1-6 in the reply filed on October 8, 2004 is acknowledged. The traversal is on the ground(s) that all species is sufficiently related that a thorough search for the subject matter of any one species would necessarily encompass a search for the subject matter of the remaining species. Applicant's representative then suggests that the search would not be a serious burden to the examiner. However, MPEP 808.02 (B), states that the examiner can insist upon restriction when distinct species are classified together but have a separate status in the art. For example, the species of Group I (Figs. 1-6) does not use a lever holder as illustrated the species of Groups II and III (Figs. 8-15). The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3682

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Young et al. (US Patent 4,296,342).

Young et al. illustrates an electromagnetic switch, a pinion gear movable along an axial direction, and a shift lever for driving the pinion gear by the electromagnetic switch, the shift lever including two sheets of resilient leaf springs supported at a middle portion thereof and having contact portions at both ends thereof, wherein the drive spring includes a slit end portion in which gaps are formed among the respective leaf springs at least at one of the contact portions.
